PERSONAL PROFILE

I am interested in fast growing IT industry, specifically about the evolving software technology which I am highly interested on. I have developed my development skills during higher education and I am willing to apply my knowledge in organisational environments as well as to improve my skills. Looking to further develop my skills by working as a software engineer in a competitive environment.

WORK EXPERIENCE

Software Engineer
Keeneye Solutions | Apr 2019 - present

- Conduct day-to-day project coordination, planning development, and implementation across teams
- Playing a team lead role and manage the development process with Agile Scrum. (Confluence, JIRA, Bitbucket)

Junior Software Engineer
Ryde Inc. Los Angeles, California | Nov 2017 - Mar 2019

- Working closely with the design team to turn mockups, elements, and user-interface components into functional code.
- Build reusable code and components for future use.
- Produce quality front-end code for website on time and in scope.
